SUMMARY

Software engineer building web, desktop and mobile applications since 2023, now a Junior Software Engineer working with .NET, React, Next.js, React Native and AWS. Promoted from intern in 7 months, contributing across frontend, backend and API integration. Detail-oriented problem solver who picks up new technologies quickly. Open to roles in Kandy or remote.

PROFESSIONAL EXPERIENCE

Junior Software Engineer **Jul 2026 - Present**

Vision Designing - Sarasota, Florida, US

- Building and maintaining web and mobile applications as part of the engineering team. Owning frontend and backend feature delivery, API integration, and testing. Contributing to UI/UX improvements and shipping production-ready software across the company stack.

Software Engineer Intern **Dec 2025 - Jun 2026**

Vision Designing - Sarasota, Florida, US

- Contributed to ongoing web and mobile application projects under senior developer guidance. Assisted with frontend and backend development tasks, supporting API integration and testing processes. Actively participated in UI/UX improvements while gaining hands-on experience with production-level development workflows and industry best practices.

Independent Software Developer **2023 - Present**

Self-employed

- Designing and building academic and personal projects end to end across web, desktop and mobile, from planning and UI to APIs, databases and deployment. Over 20 projects so far, including a café POS, a real-time donation platform and an AI shopping agent, with several live in production.

Committee Member **Mar 2025 - Jul 2025**

ICBT Student Council, ICBT Kandy

- Active committee member contributing to student council initiatives and activities.

Secretary & Event Coordinator **Jan 2025 - Feb 2025**

Dream 360 Exhibition, ICBT Kandy

- Conducted educational & entertainment events, managing event coordination and administrative responsibilities.

Student Instructor **Feb 2024 - Dec 2024**

Jeewithayata Physics

- Translated Physics resources from Sinhala to Tamil, conducted paper marking, and provided student support.

Translator **Dec 2023 - Feb 2024**

Achiever Academy

- Translated Chemistry resources from Sinhala to Tamil.

PROJECTS

AromaCafe POS (Electron, React, Vite, SQLite, Tailwind CSS)

- A desktop Point of Sale application built for café operations with Electron, React, Vite, and SQLite. It runs fully offline with no server dependency, featuring a product catalog with stock management, cart and checkout with automatic change calculation, and sales history with itemized receipts. Styled with Tailwind CSS and packaged as a standalone desktop build.

LocalGro (React, Vite, Tailwind CSS, React Router)

- A role-based supply chain and warehouse management frontend for Sri Lanka's fresh produce industry. Built with React 19, Vite, and Tailwind CSS, it includes a landing page, demo login for Admin, Warehouse Manager, Delivery, Finance, and Customer roles, inventory CRUD with search and low-stock filters, and order and delivery flows. Built frontend-first with mock data, with backend and database integration next on the roadmap.

SmartBee (React, React Native, Expo, Node.js, Express, Supabase)

- An open-source campus life management platform for students, bringing module tracking, attendance monitoring, a daily planner, and an AI-powered virtual assistant together in one place. Cross-platform with a React web app, React Native + Expo mobile app, and a Node.js/Express API with JWT and Zod, using Supabase (PostgreSQL) for data persistence.

5Min Forecast (React, TypeScript, TanStack Start, Supabase, Tailwind CSS)

- A sales CRM and monthly forecasting tool for small teams. Sales reps keep deals current on a pipeline board while managers get clear forecast and team performance views in minutes instead of spreadsheets. Includes contacts management, CSV import, role-based Sales Rep and Sales Manager views, and Supabase auth with row-level security.

ලක් Seva (LakSeva) (Next.js, TypeScript, Tailwind CSS, Netlify)

- A community-driven local service marketplace for Sri Lanka that connects people with trusted local providers - electricians, tutors, caterers, photographers, tailors, and more. Features search by category or location, provider profiles, ratings and reviews, and multi-language support in Sinhala, Tamil, and English.

Talk With EMO (React, TypeScript, Vite, Tailwind CSS, GSAP)

- An emotional intelligence web experience where you talk to the emotion you're feeling - not about it. Built around five core emotions inspired by Pixar's Inside Out, each with its own personality and conversational style. Features cinematic parallax scrolling with GSAP and Lenis, immersive character sections, in-browser chat, and a short emotion quiz.

Gather (React, Node.js, Express, MongoDB, Socket.io, Cloudinary)

- A real-time media collection platform that lets event attendees upload photos and videos via a unique link or QR code - organized, moderated, and ready to share. Hosts manage upload permissions and content visibility, while attendees can like, comment, and react. Includes a live slideshow mode for event screens and private gallery sharing.

My Portfolio (React, TypeScript, Tailwind CSS, Framer Motion, Vite, EmailJS)

- A modern, responsive personal portfolio website built with React, TypeScript, Vite, and Tailwind CSS. Features smooth animations with Framer Motion, a project showcase with image carousels, CV viewer with PDF download, contact form via EmailJS, SEO optimization, and PWA support for offline access. Deployed on Vercel.

FitZone Fitness Center (React, Vite, React Router, CSS3, JavaScript)

- A fitness center web application built with React 19, Vite, and React Router that lets users explore classes, connect with trainers, register for memberships, and manage sessions online. Includes dedicated dashboards for customers, staff, and admins with role-based access, plus public pages for services, trainers, membership plans, blog, and contact. Deployed to GitHub Pages via GitHub Actions.

Smart Restaurant Experience (React, React Router, React Context, CSS3, JavaScript)

- A role-aware React application designed to improve the restaurant experience for customers, owners, staff, and admins. Features an interactive menu with category filtering, food detail pages with pricing and quantity controls, a shopping cart with localStorage persistence, and an order form with branch and delivery options. Built with a mobile-first responsive UI focused on decision-making and operational efficiency.

WeatherApp (PHP, OOP, HTML5, CSS3, OpenWeatherMap API)

- A PHP weather application built as part of a Laravel PHP Fundamentals mini-course, with both a CLI version and a responsive web interface. Uses the OpenWeatherMap API to fetch real-time temperature, description, humidity, and city info, includes a demo mode that works without an API key, and applies core PHP and OOP concepts.

Kapruka ASA (AI Agents, MCP, Conversational UI, E-commerce)

- An AI shopping agent built for the Kapruka Agent Challenge 2026 - a conversational commerce experience on Sri Lanka's largest e-commerce platform. Helps customers discover products, check delivery, and complete guest checkout through natural conversation using the public Kapruka MCP with live products, delivery quotes, and checkout.

HushLines (Next.js, React, CSS Modules)

- A literary-focused web platform for short stories, poems, fragments, and personal journaling, designed with a dreamy reader view. Blends fantasy storytelling with an intimate journal aesthetic, including light and dark themes, date-tracked journaling, and a margin annotation system. Built with Next.js in collaboration.

TransitLK (React, Node.js, Express, MongoDB, Google Maps, JWT)

- A Smart Route Management and Scheduling System for Sri Lankan public transport depots. Supports route planning with Google Maps, daily timetables with conflict detection, fleet and driver management with CSV import, maintenance and fuel logging, analytics with PDF export, and role-based schedule approvals across six user roles. Built as a MERN-stack academic project.

SmartMed (C#, .NET Framework, Windows Forms, SQL Server)

- A Windows Forms desktop pharmacy management system built with C# and .NET Framework 4.8, backed by SQL Server. Supports Admin workflows for inventory, customers, order fulfilment, reporting, and dashboards, plus Customer flows for medicine search, ordering, order tracking, and profile management with secure password hashing.

EchoSphere (JavaScript, Vite, Agent Simulation, FSM)

- An intelligent agent simulation implementing perception, reasoning, action, and learning in a dynamic multi-agent environment. The autonomous agent operates through a sense–think–act–learn cycle driven by internal state, a finite state machine, and persistent memory, with multimodal perception, emotional intelligence, pathfinding, and inter-agent communication.

ShareLanka (React, Node.js, Express, MongoDB, Firebase, Socket.io, Cloudinary, Tailwind CSS)

- HD final group project: a community platform for donating and requesting items across Sri Lanka. Users browse and filter by category and location, chat in real time, leave reviews, manage wishlists, and report content. Admins handle moderation with bans, suspensions, and appeals. Auth via Firebase (Google OAuth and email/password); media via Cloudinary.

GadgetHub (C#, ASP.NET Web API, ASP.NET Razor, SQL Server, Entity Framework)

- A SOA-based online gadget store that connects with multiple distributors to fulfill orders efficiently. Handles quotation requests, price comparison across ElectroCom, TechWorld, and GadgetCentral, and automatic ordering with the best distributor. Built with ASP.NET Core Web APIs (.NET 8), SQL Server, Entity Framework Core, and a Razor Pages client.

GreenLife (PHP, MySQL, HTML5, CSS3, JavaScript)

- An interactive wellness management web app for GreenLife Wellness Center in Colombo. Built with PHP, MySQL, HTML5, CSS3, and JavaScript, it supports Client, Therapist, and Admin roles with dedicated dashboards for appointment booking, session scheduling, resource management, and client–therapist communication.

LuxeVista (Java, Android Studio, Firebase, Cloudinary)

- A native Android app for LuxeVista Resort that lets guests browse and book rooms, reserve spa and dining services, explore local attractions, and manage their stay. Powered by Firebase (Auth, Firestore, Realtime Database, Storage) with Cloudinary for images, plus an admin side for rooms, bookings, guests, analytics, and reporting.

OrchiFlora (C++, HTML, CSS, JavaScript)

- A temperature analysis system to help orchid planters find optimal growth conditions based on day–night fluctuation. Includes a C++ console app for structured programming practice and a web app with HTML, CSS, and JavaScript featuring data entry, fluctuation analysis, suitability checks, Celsius–Fahrenheit conversion, localStorage, and CSV export.

The Pawsshop (Java, Java Swing, OOP, File I/O)

- A Java Swing desktop pet supply management system with role-based access for cashiers and managers. Supports inventory viewing and updates, category search and filtering, shopping cart checkout with reports, and manager-only cashier account creation. Uses flat-file storage so it runs without a database setup.

TECHNICAL SKILLS

JavaScript, TypeScript, Java, PHP, C++, C#, R, HTML5, CSS3, React, React Native, Next.js, Node.js, Express, .NET, Tailwind CSS, AWS, MongoDB, MySQL, Firebase

EDUCATION

ESU Kandy (Affiliated with London Metropolitan University, UK) Mar 2026 - Present
BEng (Hons) in Software Engineering

ICBT Kandy (Affiliated with Cardiff Metropolitan University, UK) May 2024 - Oct 2025
HD in Computing & Software Engineering - Distinction

PharmAdya (Awarded by Sri Lanka Medical Council) Nov 2023 - Present
Certificate of Efficiency as a Pharmacist

Kandy Girls' High School 2019 - 2023
G.C.E. Advanced Level - Biological Science

Viharamahadevi Girls' College Kandy Grade 6 - 11
G.C.E. Ordinary Level
